

The Optics Institute
Of Southern California

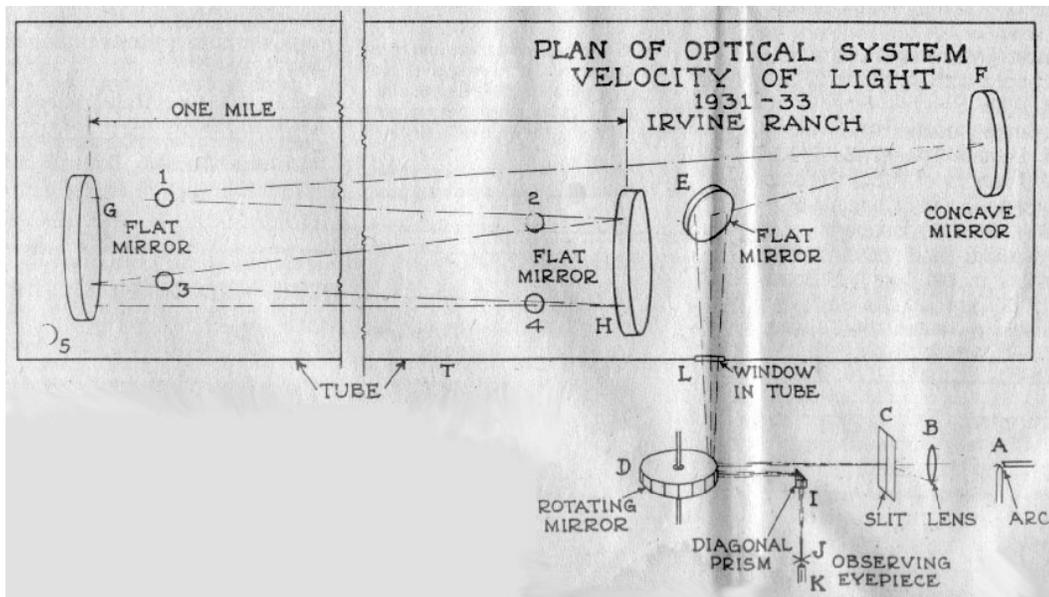

Presents

The Speed of Light

An Exhibit at Irvine City Hall
Coming October 2004

Celebrating over 70 years of High Technology Research
And Innovation in Optics and related Sciences.

The Michelson Speed of Light Experiment at the Irvine Ranch

$C = 299,792.4562$ kilometers per second, plus or minus 1.1 meters per second

The exhibit will include:

- a scale model of the former experiment site on an 8'x4' table (under glass)
- a modern version of the experiment in a sealed 'see-thru' cabinet.
- several large 10'x6' panels to mount graphics and explanatory text nearby
- information on other related science and technology developed through the years.

The exhibit will be open to the public and teachers will be encouraged to bring their students.

This presentation marks the beginning of the OISC's Exhibit Committee's work. Watch for more!!

Sponsorships are available.
